

Aloe Vera Moisturizers

Invention summary:

Aloe vera is rich in moisturizing properties naturally; therefore, formulating the product with Aloe vera gives additional advantage.

Technology overview:

Moisturizers are products that are intended to hydrate the skin. The product is moistening the skin and giving smooth appearance by preventing moisture from the skin. They also provide a barrier against the loss of water from the skin. Moisturizers contain special ingredients that help to replace the oils contained in the skin or to protect against the loss of moisture from the skin. The safety of Moisturizers is established by selection of ingredients that are safe and suitable for this purpose.

Potential Application:

Can be applied to retain the moisture on skin

Advantages of the Aloe vera Moisturizer:

- Having Aloe vera gives moistening effect naturally
- All ingredients are available in the local market including fresh Aloe gel
- Can be made at domestic level in proper hygienic environment
- It contains less chemical
- Machineries can be fabricated locally

Inventor /s:

Ms. P.I.P.K. Fernando
