

Ceylon Cinnamon

Nutraceutical Capsule

Invention Summary

- Clinically proved product

Technology overview:

The product was developed by using Ceylon cinnamon, *Cinnamomum zeylanicum* blume as the raw material. This particular product is not just the powdered cinnamon; but the dried extract of quality cinnamon quills which does not contain coumarin traces which is toxic to humans. It mainly contains procyanidins which has a blood sugar and cholesterol lowering effect. The product is standardized for tannin content and tested by clinical trials on healthy volunteers as well as diabetic patients. The product and its technology are ready for transfer with the clinical trial data. The product does not have any side effects as it has been proven by clinical trials.

Potential Applications

As a nutraceutical for the reduction of blood sugar and cholesterol levels

Advantages

- Ceylon cinnamon feathering or chips used for essential oil production can be reused to manufacture this product
- Coumarin free product with no toxicity
- Product is in capsule form which is easy to use
- The product is hot water soluble and can therefore, be incorporated in black tea or milk tea
- The product is fat and essential oil free

Patent application No - 19248
