

Herbal Toothpaste

Invention summary:

Product was developed using traditional herbal (Moonamal, Aralu, Gammiris) powders

Technology overview:

Toothpastes are pastes, powders, gels, or other preparations for oral care, and intended to prevent the formation of cavities and plaque in the mouth. Toothpaste is recommended by dentists to be used in conjunction with a toothbrush to help remove food debris and dental plaque. Use of herbals prevents the growth of harmful bacteria and maintains the oral hygiene.

Potential Application:

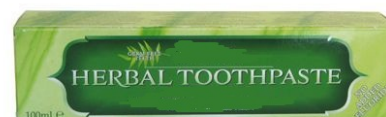

Used for oral care and refresh of breath

Advantages of the Herbal Shampoo:

- All ingredients are available in the local market
- Can be prepared at the domestic levels
- It contains less chemical
- Machineries can be fabricated locally (large scale preparations)

Inventor /s:

Ms. P.I.P.K. Fernando
