

# Chewable Moringa tablet- An innovative low cost Health supplement

## Invention Summary:

The elements of moringa leaves are formulated in to a chewable tablet using a direct compression method and presented as a low cost, innovative health supplement.

## Technology Overview:

Moringa leaves are enriched with nutrients and contain anti-oxidants, anti-inflammatory compounds, phenolics, flavonoids and complete protein with essential amino acids.

The bitterness of Moringa leaves is masked through the use of natural tamarind. The tablet improves oral health allowing better absorption of nutrients in the oral cavity minimizing first pass metabolism.

## Applications

- Health supplement

## Advantages

- It is easy to consume or chew and can be taken without water.
- A low cost alternative to imported food supplies.
- Improves oral health in addition to nutritional value.

## Inventor /s :

Dr. R. Samarasekara
